Professional Profile

Highly efficient **Full Stack Engineer** with 3 years of experience across the entire software development lifecycle. Proficient in **React, TypeScript, and .NET**, I integrate **AI tools** into my daily workflow to streamline development and maintain robust code standards. Experienced in managing complex data migrations and deploying cloud-native applications for financial and e-commerce platforms.

Technical Skills

React	JavaScript	TypeScript
Angular	HTML	CSS
Tailwind	Nextjs	Express
BaaS (appwrite, supabase, Neon)	ORM (Prisma, Drizzle)	PostgreSQL
MySQL	Python	.NET
Git	GitHub	AI (Claude, Copilot)
Nodejs	Java	

Work Experience

Pig Farm / Software developer & Data Analytics

January 2023 - Present, San José, Puriscal

Engineered B2B web applications and architected the company's serverless livestock control system using **React, TypeScript, Vercel, and Neon**. Additionally, designed automated data workflows leveraging **Python and MySQL** to translate raw operational data into actionable business insights.

Projects

Financial SaaS / Taku-cash

March 2026 - Present, Alajuela, Alajuela

Architect and Lead Developer of **Taku-cash**, a comprehensive financial SaaS platform built with **React, TypeScript, and Appwrite**. The application manages the complete monetary flow for users, prioritizing **data security and real-time accuracy** through optimized state management and a scalable headless backend architecture

Sneakers Catalog / Tennis Fresonas

February 2026, San José, Puriscal

Lead Developer for **Tennis Fresonas**, a real-world D2C (Direct-to-Consumer) catalog and sales platform built with **React and Supabase**. I implemented a robust management system featuring secure user authentication and a full **CRUD administrative dashboard**, enabling the physical store to digitize its inventory and manage products efficiently in real-time.

Agricultural Management System / PostDestete

December 2025 - January 2026, San José, Puriscal

Architect and Developer of a specialized **Agricultural Management System** for swine livestock control. Built with **React and Vercel Serverless Functions** connected to a **Neon (PostgreSQL)** database, the application streamlines the tracking of post-weaning mortality. This real-world implementation provides the farm with critical operational data to improve livestock health and reduce losses through a high-performance, cloud-native interface.

E-commerce / CoolStreet

August 2025 - November 2025, Alajuela, Alajuela

Architect and Lead Developer of a comprehensive end-to-end e-commerce platform for **CoolStreet**, built with **Angular, Express, Node.js, and MySQL**. The system centralizes the store's entire retail operation, managing everything from the customer shopping experience and **payment gateway integration** to internal workflows such as **automated billing**, secure authentication, and inventory management. This solution fully digitized the sales cycle, providing robust control over financial transactions and stock levels.

Education

Universidad Técnica Nacional / Software Engineer

January 2023 - Present, Costa Rica, Alajuela, Alajuela

Colegio Técnico Profesional de Puriscal / High School Diploma

January 2017 - December 2022, Costa Rica, Alajuela, Alajuela

Additional Training

- Soft skills Development Course (communication, teamwork and professional ethics).
